# INTRODUCTION

# WELCOME

Welcome to the 2018 Matrix Catalogue, we have 68 pages packed with exciting new products as well as the extremely popular items that have been kept within the Matrix range. It's been another exciting and fast paced year for Matrix as the brand goes from strength to strength and continues to bring exciting and innovative products to anglers.

All our products are carefully designed with the help of our dedicated product development team and with input from some of the best anglers across Europe.

Each item is produced using the highest quality materials available and incorporates the latest technology and manufacturing process. Our products are developed and tested with the help our team of European consultants so you can be confident that each product is designed to perform at the highest level.

In this catalogue you will find new additions to the hugely popular Superbox S25 & S36 seatboxes. We've expanded our range of the stylish, durable and much sought after Ethos Pro luggage and the highlight of the catalogue for most will be the complete range of flagship Horizon rods which we feel are the best we've ever produced.

# ***SEATBOXES***

The Lime S36 Superbox was the box of 2017. Unrivalled quality and value saw demand go through the roof and for 2018 we've introduced the S25 Lime which is sure to get anglers racing to their local tackle shop. There is also a new Black version of both Superboxes available, as well as a new Blue S36.

All Matrix boxes are built on the same popular modular system that enables you to upgrade your existing Matrix seat box system easily and affordably.

For 2018 we've also introduced the new Matrix Pole Winders and Trays that offer efficient and safe storage of all your pole rigs and will no doubt be on the shopping list of every Matrix seatbox owner.

# ***RODS***

The Horizon name has become a sign of quality when it comes to rods and when we decided to put the name to a complete new range of premium rods we knew they would have to be special. More than a year of development has resulted in a range of rods that has surpassed everything we hoped for. Quality and performance have been built into every detail and we feel the Horizon name has now been taken to another level.

# SQUEEZE AND FEED METHOD MOULD

The Squeeze and Feed Method moulds are available in three sizes and are designed to work with all of the Evolution Method Feeders (both In-Line and Elasticated). We have designed the moulds to be deeper than other versions on the market, which allows you to use more bait on the feeder should you want. This extra depth also provides more movement for solid compression when loading a feeder. The mould couldn't be easier to use and works perfectly with both groundbait and softened pellets. Simply place your hookbait into the mould and then fill it with the groundbait or damp pellets of your choice. Push the feeder face down into the mould, turn the mould over and squeeze both sides. The Method feeder will release from the mould perfectly loaded, with the hookbait on top and ready for casting.

The small holes in the base of the mould prevent a vacuum forming during compression producing a better loading

The deep moulded ends accommodate most Method feeders and provide more movement for compression

The unique design of the base, with central slots and compression sides, enables the feeder to be 'squeezed' out

## METHOD FEEDER MOULD

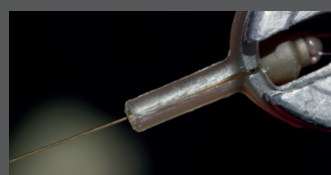

- For use with all Matrix Method feeders
- Also works with many other flat Method feeders
- Deep design lets you load up the Method feeder with more bait than normal moulds if you want
- Soft malleable material for easy release of feeder
- Available in 3 sizes
- **SMALL - GFR123** £3.25
- **MEDIUM - GFR050** £3.49
- **LARGE - GFR061** £3.99

**1** Start by placing your hook through the hole in the base of the feeder.

**2** Next place the Rubber Quick Bead through the same hole in the base.

**3** Carefully position your mainline through the slot in the back of the stem.

**4** Push your tail rubber back down over the stem to secure everything in place.

# EVOLUTION® METHOD FEEDER

The Matrix 'Evolution Method Feeders' have been designed to meet the latest needs of match anglers. With its quick change line slot and removable tail rubber changing between feeders has never been easier.

## HOW TO LOAD A METHOD FEEDER

**1** Place your chosen hookbait into the bottom of the Squeeze and Feed mould.

**2** Add your chosen groundbait and/or dampened pellets into the mould.

**3** Fill the mould to the top and push your feeder face down into the free feed.

**4** Turn the mould upside down, give the sides a squeeze and you're ready for action!

## HOOKS

Hooks are possibly one of the most important items of tackle that you'll buy and can be the deciding factor in a capture or a match win. This is the reason we've spent many hours developing a range of hooks that you can have complete confidence in. We've also put two of our most popular hooks on the new EVA spools, ready tied to our consultants' exact specifications and ready for any feeder angler.

### MATRIX FEEDER RIGS

The new Matrix Feeder Hooklengths have been tied to our consultants' exact specifications using the very best Matrix Hooks and Line. They're available in a selection of sizes and diameters so no matter the species you're targeting there'll always be a suitable choice.
