## TO THE 2018 FOX RAGE PRODUCT CATALOGUE.

The next 84 pages are absolutely crammed full of tackle, from rods and reels to lures and luggage, with everything inbetween, offering high-quality predator products to suit a range of budgets. Most importantly, everything you'll find in this catalogue has been designed with one purpose in mind – to help you get more from your predator fishing. So, whether you're on the hunt for monster pike, have a passion for micro jigging for perch and zander, want to tackle big river catfish, or are just thinking of trying lure fishing for the first time, you'll find what you want and need right here.

This year we are extremely proud to have a number of incredibly exciting new products. These include the evolution of the Replicant lure range to include the phenomenal Replicant Shallow along with new Super Natural colour patterns. The new range of Prism rods is also a superb addition, offering amazing quality and ability at an incredible price. Plus, with additions such as the Pro Grub curly tail lure, the outstanding RS20K waterproof clothing and Winter Suit, alongside highly innovative products like the Dropshot Fly and Fry lures, you'll be spoiled for choice with what to treat yourself to next. Enjoy.

# LURES

From the smallest Mini Fry to the largest Replicant Wobbles, Fox Rage offers everything the modern, freshwater lure angler could want to hunt a range of predators. Within these lures there are some legendary names: Replicant, Pro Shad and Zander Pro to name just a few, offering anglers incredible action and attraction at the sharp end of their fishing. Soft or hard, the Fox Rage range delivers cutting edge lure design and colours, along with classic predator-catching abilities that will help you get much more from your lure fishing.

## LURES

### REPLICANT®

A lure that needs no introduction, these legendary swimbaits have new additions and updates for 2018, including the brilliant Replicant Shallow and Realistic Pike and Roach.

A brand-new lure for the Rage range, the Pro Grub takes our know-how with shad bodies and delivers curly tail movement, for an action that drives fish crazy.

A slender profile soft plastic shad which delivers a big impact in a delicate design. The new Slick Shad creates a subtle action even at low speed and is perfect for both jig head mounting and Texas rigging.

### DROPSHOT FLY/FRY

Lures that have created a huge buzz in angling circles, the new Fly and Fry use fibre tails with buoyant soft plastic bodies to deliver an underwater action like nothing you've seen before.

## DEPTHS

Always remember that you need to present your lure where the fish are sitting and feeding, meaning the depth you work your lure will make a big difference to your success. With soft plastic lures, the balance of weight and speed are key to achieving the right depth presentation. This means matching your lure to the right jig head. With hard lures you are looking for the prescribed diving depth and whether the lure sinks or floats.

## ACTION

Getting the lure with the right action can make a huge difference to whether you catch or not. Large paddle tails such as the Replicant Wobble, delicate pin tails like the Tiddler slow or curly tails as on the new Pro Grub will all have their day depending on what the fish are reacting to. Meaning you need to have options in your lure box so you can give them what they want, when they want it, and keep catching.

## RIGGING

From jigging or dropshot to Texas set-ups and weightless presentation, rigging is all about achieving the right action, speed and depth to get those predators to strike your lure. This means you need different options available when you go fishing, so make sure you take the right lure rigging accessories with you – it will make all the difference.

# RODS

From firing out large Replicants or Pro Shad, to imparting the most delicate of movements into a Dropshot Fly, the Rage range of rods has everything the modern lure angler could need.

Created by anglers for anglers, each rod under Rage's three brands is focused on its purpose to deliver what you really need within any lure fishing situation. Each rod range is also carefully engineered to provide maximum quality within your given budget, meaning, whatever rod you're looking for, you'll find it here.

## RODS

### TERMINATOR<sup>®</sup> — PRO —

IM9  
MDC

Fuji  
SiC

The cream of Rage rods, the Terminator name has become synonymous with quality and performance – and that well-deserved reputation continues into 2018. Consisting of 20 different models with 30 rods in total, the Terminator range covers everything from the lightest of finesse techniques to powerful casting demands.

### PRISM<sup>®</sup>

Fuji  
SiC

New for 2018, Prism rods cover a wide range of lure fishing tactics and situations, while offering incredible performance for money. With a modern design and quality construction, the Prism range offers rods from light jigging through to jerk baiting, along with everything inbetween.

### WARRIOR<sup>®</sup>

SLIK  
SiC

Rage's entry level range, Warrior rods are no less designed for purpose, offering amazing value for money while delivering performance that will enhance the lure fishing of beginners and experienced anglers alike.

L = LENGTH	CW = CASTING WEIGHT	A = ACTION	G = GUIDES
W = WEIGHT	TL = TRANSPORT LENGTH	S = SECTIONS	

## CASTING WEIGHT

Before buying a lure rod you really need to think about the type of fishing you'll be using it for – and especially the size and weight of the lures you'll want it to cast and work. A rod's casting weight is the range of weight that the rod is specifically designed to cast in comfort. Go above or below this and you casting accuracy and distance will suffer, and there's also a good chance you will damage your rod.

## ACTION

Every rod is built on a blank that will give it a specific action. These range from a very fast action where the tip reacts very quickly and the rest of the rod reacts less and less as it's weighted up, to a through or parabolic action where the rod bends evenly throughout when under load.

## CAST OR SPIN

Lure rods can be split into two types: casting and spinning. Spinning rods are designed for use with a fixed spool reel which sits under the rod with the line guides also underneath the blank. A casting rod is designed for baitcaster or multiplier reel which sits on top of the rod, the line guides will also sit on top of the blank. A casting rod will often have a trigger under the reel seat to allow you to balance the rod while fishing.

# REELS

If you're after reels that not only deliver brilliant performance and take everything you throw at them, but also look the part and won't break the bank, you've found them right here.

Coming in two different ranges, Rage reels have something to offer everyone, from the beginner through to the experienced lure angler. Both Rage's Prism and Warrior reels cover the main sizes lure anglers have come to expect, and offer exceptional value for money.

REELS

## PRISM®

Following years of development and testing, the Prism hit tackle shop shelves last year and has gone down a storm – and it's easy to see why. A silky smooth, six ball bearing performance, a brilliantly balanced rotor eliminating wobble and superb line lay, all matched with stunning looks and incredibly low prices across all three models.

## WARRIOR®

The entry level range of Rage reels, the Warriors offer incredible value for money within a robust, smooth and reliable package. Available in three sizes, if you're after a solid reel for your lure fishing – from dropshotting and ultralight work, to larger lure work for pike and zander – that won't impact on our bank balance, you've just found it.

# ACCESSORIES

From top-quality luggage and clothing to snaplinks and hooks, Fox Rage has all the accessories the modern lure angler needs to help them get more from their fishing.

All of the items you'll find here deliver a mix of inventiveness and angling experience. Quality is of course the watchword, while at the same time the Rage range also offers great value for money. So whether you're looking for a new braid or a stylish hoody to get out on the bank with, you'll find it here.

## ACCESSORIES

### LINE

Rage offers a wide selection of braids and fluorocarbons, including the brilliant Pro X8 and Warrior braids, both new to the range.

### TOOLS

Must have items for unhooking fish and creating rigs, all of our tools are designed to get on with the job, offering you ability and reliability in equal measure.

### LUGGAGE

The Rage Voyager range of luggage has become synonymous with quality, durability and great design, whether you're after a waterproof bag, a small carryall or a rucksack, you'll find everything you need.

### CLOTHING

Stylish and built for purpose, the Rage range of clothing now includes the incredible new RS20K Ripstop jacket and salopettes as well as the brilliant Winter Suit, both designed to let you take on the elements and win.

## LINE

For modern lure fishing braid is by far the best mainline option. Offering a far superior diameter to breaking strain ratio to mono, as well as its none stretch properties, braid will help you feel bites much more easily and set your hooks into hard, predatory mouths.

## TOOLS

Our advice is to never go lure fishing without unhooking tools. Pliers and or forceps are a must to unhook fish quickly and easily. If you're after pike, longer pliers and side cutters are also a brilliant investment than can come in extremely handy.

## LUGGAGE

Your choice of luggage can make a huge difference to your fishing. Keeping mobile with smaller waist bags will allow you to cover more water, while a large carryall can store everything you need for a day's boat fishing. You may find different luggage for different situations suits your needs better.

## CLOTHING

When you're out in the rain, cold or heat, your choice of clothing can make or break a session. Keeping yourself protected from the elements will allow you to fish longer and more effectively, meaning you will ultimately catch more fish.

# FOX RAGE PREDATOR®

When it comes to catching big predators, bait fishing has the power to draw them in and make them bite. Key to making the most of this style of fishing though, is the right tackle.

Strong rods with the power to cast and set hooks, bite indication specifically designed for the job, along with all of the accessories to help you achieve the perfect presentation are exactly what the bait angler needs – and that's exactly what Fox Rage Predator delivers.

FOX® RAGE PREDATOR®

## RODS

Designed for purpose and with the abilities to help you get more from your fishing, the Rage Predator range of rods covers all the areas the dedicated dead baiter needs.

L = LENGTH	CW = CASTING WEIGHT	A = ACTION	G = GUIDES
W = WEIGHT	TL = TRANSPORT LENGTH	S = SECTIONS	

## FLOATS

Whether you're fishing static or trolling, targeting stillwaters or rivers, or presenting big herring or small roach; the Rage Predator float range has all your bases covered.

## ACCESSORIES

Designed and implemented based on years of predator experience, Rage Predator accessories offer solid reliability and brilliant performance that will help you put more fish on the bank.

## **RODS**

Before choosing your deadbait rod it's crucial that you know what kind of bait fishing you will be doing. From bank to boat the requirements are very different, as is the size of bait you want to present and the range at which you'll be fishing.

## **RIG STORAGE**

Whether you've built your own or gone for the brilliant pre-constructed Rage Predator traces, keeping them stored correctly is a must if you don't want a large, kinked and tangled mess. A rig storage bin is the perfect solution, storing your rigs safely.

## **BITE INDICATION**

Sensitive bite indication is crucial for bait fishing to avoid deep hooked fish. Drop off indicators and sensitive bite alarms will give you the edge with this and help you get more enjoyment from your fishing.

Big, strong, intelligent and one of the hardest fighting species you'll find swimming in freshwater, the catfish is an incredible animal and a species that inspires a growing band of anglers to take it on. It's a species that deserves both respect and thought, and that means taking these colossal fish on with the right tackle to hand.

Fox Rage Cat is driven by a passion for the species along with decades of angling experience to bring you the tackle and accessories that deliver everything you need to catch the fish you're targeting. From specifically designed rods and reels, to hooks, floats and pre-tied rigs, whatever level you're at, you'll find everything you need to catch cats right here.

FOX® RAGE CAT

## RODS

Designed for purpose, each of the Rage Cat rods is constructed to handle the hardest fighting of catfish. Built from quality components, including Fuji reel seats, Fuji or Fox Slik guides, quality blanks and moulded EVA handles, Rage Cat rod are there to get the job done.

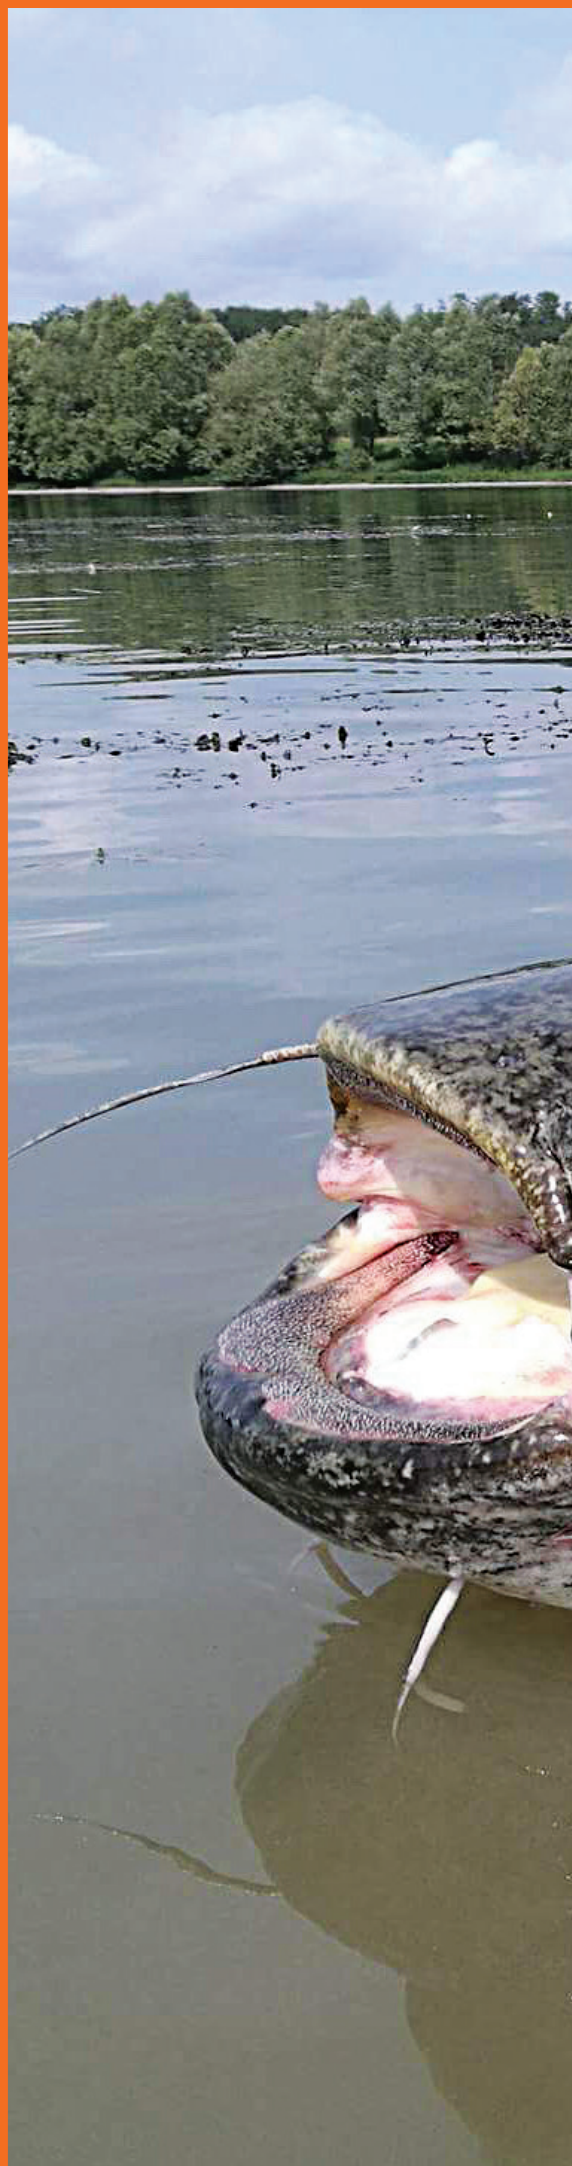

L = LENGTH	CW = CASTING WEIGHT	A = ACTION	G = GUIDES
W = WEIGHT	TL = TRANSPORT LENGTH	S = SECTIONS	

## REELS

Big, strong and capable of taking on the demands this species places on them, the CR reels come with a multitude of features, all focused on helping you put more and bigger cats on the bank.

## ACCESSORIES

High-quality and designed with thought and experience, the Rage Cat range of accessories offers plenty for all catfish anglers, from the highly experienced to the complete beginner.

## RODS

There are a number of methods that you can use to effectively target cats, including bait or lures, bank or boat. To make sure you get the right tool for the job, you first need to work out how and where you will be fishing for the species.

## RIGS

Cats can be funny creatures, meaning you need to go prepared for a number of eventualities and scenarios. Different rig types and the ability to create a set-up to best suit the conditions can pay off big time – so make sure you have your bases covered.

## HANDLING

Just based on their sheer dimensions catfish need special handling. Mats, clothing, landing nets... they all need taking into account before you put your baits out. The last thing you want is a monster on one end of the line and no idea how you're going to land or unhook it at the other.
